1. INTRODUCTION

1.1 PURPOSE OF THE TEST PLAN DOCUMENT

This test plan document is written to detail the problems and threats that may arise during the testing process of the Research Analytics Approval and Archiving System. Its characteristics, roles, and required items will be addressed. This research plan will keep track of the details required to figure out a better way to test the system. It is intended for use by the development team as well as others that will be working with the device in the near future.

2. COMPATIBILITY TESTING

2.1 TEST RISKS/ ISSUES

All types of browsers are handled by the project. However, based on browser compatibility testing, the Research Approval Analytics and Archiving System is generally advised for increased optimization when using Google Chrome. It may also have an impact on the orientation of things on its web pages.

2.2 ITEMS TO BE TESTED

Items to test	Test Description	Responsibility
Super Admin Module		
Login & Logout	Test if the system allows the admin to login and logout their account	Tester
Set researches to preview	Test if the system allows the super admin to set researchers to preview	Tester
Add Course	Test if the system allows the super admin to add courses	Tester
Activate & Deactivate Course	Test if the system allows the super admin to activate and deactivate courses	Tester

Software Test Plan for Research Analytics Approval and Archiving System

Add Gender	Test if the system allows the super admin to add gender	Tester
Activate & Deactivate Gender	Test if the system allows the super admin to activate and deactivate gender	Tester
Add Year Level	Test if the system allows the super admin to add year level	Tester
Activate & Deactivate Year Level	Test if the system allows the super admin to activate and deactivate year level	Tester
Add Academic Status	Test if the system allows the super admin to add academic status	Tester
Activate & Deactivate Academic Status	Test if the system allows the super admin to activate and deactivate academic status	Tester
Add Faculty Status	Test if the system allows the super admin to add faculty status	Tester
Activate & Deactivate Faculty Status	Test if the system allows the super admin to activate and deactivate faculty status	Tester
Add Document Type	Test if the system allows the super admin to add document type	Tester
Activate & Deactivate Document Type	Test if the system allows the super admin to activate and deactivate document type	Tester
Add Forum Setting	Test if the system allows the super admin to add forum setting	Tester
Activate & Deactivate Forum Setting	Test if the system allows the super admin to activate and deactivate forum setting	Tester
Add Reason for Disapproval of Forum	Test if the system allows the super admin to add disapproval of forum	Tester
Activate & Deactivate Disapproval of Forum	Test if the system allows the super admin to activate and deactivate disapproval of forum	Tester
Add Research Category	Test if the system allows the super admin to add research category	Tester
Activate & Deactivate Research Category	Test if the system allows the super admin to activate and deactivate research category	Tester
Add Reason for Disapproval of Research	Test if the system allows the super admin to add disapproval of research	Tester
Activate & Deactivate Disapproval of Research	Test if the system allows the super admin to activate and deactivate disapproval of research	Tester
Add Event Type for Forum	Test if the system allows the super admin to add event type for forum	Tester
Activate & Deactivate Event Type for Forum	Test if the system allows the super admin to activate and deactivate event type for forum	Tester
Add Roles	Test if the system allows the super admin to add roles	Tester
Activate & Deactivate Roles	Test if the system allows the super admin to activate and deactivate roles	Tester

Software Test Plan for Research Analytics Approval and Archiving System

Add Modules	Test if the system allows the super admin to add modules	Tester
Activate & Deactivate Modules	Test if the system allows the super admin to activate and deactivate modules	Tester
Add Permission	Test if the system allows the super admin to add permission	Tester
Activate & Deactivate Permission	Test if the system allows the super admin to activate and deactivate permission	Tester
Add User Accounts	Test if the system allows the super admin to add user account	Tester
Activate & Deactivate User Accounts	Test if the system allows the super admin to activate and deactivate user account	Tester
Administrator Module		
Login & Logout	Test if the system allows the admin to login and logout their account	Tester
Scan Barcode	Test if the system allows the admin to scan barcode to preview research	Tester
Approve Research	Test if the system allows the admin to approve submitted research	Tester
Deny Research	Test if the system allows the admin to deny submitted research	Tester
Enable Full Research View	Test if the system allows the admin to enable full research view	Tester
Configure School Year	Test if the system allows the admin to configure the academic school year	Tester
Configure Director	Test if the system allows the admin to configure the current director	Tester
User Activity Log	Test if the system allows the admin to view the activities done by the user	Tester
Add Forum	Test if the system allows the admin to add forum	Tester
Approve Forum	Test if the system allows the admin to approve forum	Tester
Deny Forum	Test if the system allows the admin to deny forum	Tester
Generate Report	Test if the system allows the admin to generate reports	Tester
Add Users	Test if the system allows the admin to users	Tester
Users Module		
Login & Logout	Test if the system allows the user to login and logout their account	Tester
Browse by Title	Test if the system allows the user search research by title	Tester
Browse by School Year	Test if the system allows the users to search research by school year	Tester

Software Test Plan for Research Analytics Approval and Archiving System

Upload Research	Test if the system allows the users to upload research	Tester
Add to Favorites	Test the system if the system allows the users to add research to favorites	Tester
Manage Research	Test if the system allows the users to manage research like edit	Tester
Print Voucher	Test if the system allows the users to print module	Tester
Guest Module		
Browse by Title	Test if the system allows the user search research by title	Tester
Browse by Keywords	Test if the system allows the users to search research by keywords	Tester
Browse by School Year	Test if the system allows the users to search research by school year	Tester

2.3 TEST APPROACH

During the research process, Research Analytics Approval and Archiving System will be reviewed on a regular basis. This method incorporates test cases. The developers are in-charge of the functionalities, ensuring that all bugs discovered have been corrected.

2.4 TEST PASS / FAIL CRITERIA

Items to test	Expected Result	Actual Results is achieved? Y or N	Pass / Fail / Not executed / Suspended
Super Admin Module			
Login & Logout	The system allows the admin to login and logout their account	Y	PASS
Set research to preview	The system allows the super admin to set researchers to preview	Y	PASS
Add Course	The system allows the super admin to add courses	Y	PASS
Activate & Deactivate Course	The system allows the super admin to activate and deactivate courses	Y	PASS
Add Gender	The system allows the super admin to add gender	Y	PASS

Software Test Plan for Research Analytics Approval and Archiving System

Activate & Deactivate Gender	The system allows the super admin to activate and deactivate gender	Y	PASS
Add Year Level	The system allows the super admin to add year level	Y	PASS
Activate & Deactivate Year Level	The system allows the super admin to activate and deactivate year level	Y	PASS
Add Academic Status	The system allows the super admin to add academic status	Y	PASS
Activate & Deactivate Academic Status	The system allows the super admin to activate and deactivate academic status	Y	PASS
Add Faculty Status	The system allows the super admin to add faculty status	Y	PASS
Activate & Deactivate Faculty Status	The system allows the super admin to activate and deactivate faculty status	Y	PASS
Add Document Type	The system allows the super admin to add document type	Y	PASS
Activate & Deactivate Document Type	The system allows the super admin to activate and deactivate document type	Y	PASS
Add Forum Setting	The system allows the super admin to add forum setting	Y	PASS
Activate & Deactivate Forum Setting	The system allows the super admin to activate and deactivate forum setting	Y	PASS
Add Reason for Disapproval of Forum	The system allows the super admin to add disapproval of forum	Y	PASS
Activate & Deactivate Disapproval of Forum	The system allows the super admin to activate and deactivate disapproval of forum	Y	PASS
Add Research Category	The system allows the super admin to add research category	Y	PASS
Activate & Deactivate Research Category	The system allows the super admin to activate and deactivate research category	Y	PASS
Add Reason for Disapproval of Research	The system allows the super admin to add disapproval of research	Y	PASS
Activate & Deactivate	The system allows the super admin to activate and	Y	PASS

Software Test Plan for Research Analytics Approval and Archiving System

Disapproval of Research	deactivate disapproval of research		
Add Event Type for Forum	The system allows the super admin to add event type for forum	Y	PASS
Activate & Deactivate Event Type for Forum	The system allows the super admin to activate and deactivate event type for forum	Y	PASS
Add Roles	The system allows the super admin to add roles	Y	PASS
Activate & Deactivate Roles	The system allows the super admin to activate and deactivate roles	Y	PASS
Add Modules	The system allows the super admin to add modules	Y	PASS
Activate & Deactivate Modules	The system allows the super admin to activate and deactivate modules	Y	PASS
Add Permission	The system allows the super admin to add permission	Y	PASS
Activate & Deactivate Permission	The system allows the super admin to activate and deactivate permission	Y	PASS
Add User Accounts	The system allows the super admin to add user account	Y	PASS
Activate & Deactivate User Accounts	The system allows the super admin to activate and deactivate user account	Y	PASS
Login & Logout	The system allows the admin to login and logout their account	Y	PASS
Scan Barcode	The system allows the admin to scan barcode to preview research	Y	PASS
Approve Research	The system allows the admin to approve submitted research	Y	PASS
Deny Research	The system allows the admin to deny submitted research	Y	PASS
Enable Full Research View	The system allows the admin to enable full research view	Y	PASS
Configure School Year	The system allows the admin to configure the academic school year	Y	PASS

Software Test Plan for Research Analytics Approval and Archiving System

Configure Director	The system allows the admin to configure the current director	Y	PASS
User Activity Log	The system allows the admin to view the activities done by the user	Y	PASS
Add Forum	The system allows the admin to add forum	Y	PASS
Approve Forum	The system allows the admin to approve forum	Y	PASS
Deny Forum	The system allows the admin to deny forum	Y	PASS
Generate Report	The system allows the admin to generate reports	Y	PASS
Add Users	The system allows the admin to users	Y	PASS
Login & Logout	The system allows the user to login and logout their account	Y	PASS
Browse by Title	The system allows the user search research by title	Y	PASS
Browse by School Year	The system allows the users to search research by school year	Y	PASS
Upload Research	The system allows the users to upload research	Y	PASS
Add to Favorites	The system allows the users to add research to favorites	Y	PASS
Manage Research	The system allows the users to manage research like edit	Y	PASS
Print Voucher	The system allows the users to print module	Y	PASS
Browse by Title	The system allows the user search research by title	Y	PASS
Browse by Keywords	The system allows the users to search research by keywords	Y	PASS
Browse by School Year	The system allows the users to search research by school year	Y	PASS

All systems' core functions should work as planned and as defined in the individual test cases. There must be no crucial flaws, and an end user must be able to effectively complete a transaction period and initiate a refund without making any mistakes. All

Software Test Plan for Research Analytics Approval and Archiving System

test cases should pass 95% of the time, and no failed cases should be critical to the end-ability users to use the app.

2.5 TEST ENTRY / EXIT CRITERIA

The following elements are required to support the overall testing effort at all levels within the system.

- A. The software requirements include: a computer or laptop with minimum requirements, a printer, and a broadband, modem, dial-up, or any kind of source for internet connection.
- B. The project requires a test plan and test cases.
- C. The project runs on the browser, pdf reader.

2.6 TEST DELIVERABLES

The test result, test cases, issues found, sample data and staff recommendations will all be included in the deliverables.

2.7 TEST SUSPENSION / RESUMPTION CRITERIA

- The test will only be halted if the device fails to work as intended or if the developers are updating it. It will restart once the developers have uploaded the most recent version and verified that all functions are operational.
- Only when the person in charge is unavailable can the test be suspended
- The test would only be halted if the device is being implemented during library business hours. It will restart when it is no longer in service.

Software Test Plan for Research Analytics Approval and Archiving System

- The test will only stop if the device is not running properly or if it is down due to system changes or improvements. It will only restart after all the problems, bugs, and errors have been resolved.

2.8 TEST ENVIRONMENTAL

The system will run on their computer or the administrative office's desktop. Testing will be handled by both the developers and the management. The users as well as the person in charge of the project setup must be computer literate. Upon testing the system, the recommended browser is chrome.

3. FUNCTIONAL TESTING

3.1 TEST RISKS/ ISSUES

The functionality of the Research Analytics Approval and Archiving System will be checked. All of the functions should function in accordance with their intended purpose. All errors should be recognized and corrected as quickly as possible if this has not been done.

3.2 ITEMS TO BE TESTED

Items to test	Test Description	Responsibility
Super Admin Module		
Login & Logout	Test if the system allows the admin to login and logout their account	Tester
Set researches to preview	Test if the system allows the super admin to set researchers to preview	Tester
Add Course	Test if the system allows the super admin to add courses	Tester

Software Test Plan for Research Analytics Approval and Archiving System

Activate & Deactivate Course	Test if the system allows the super admin to activate and deactivate courses	Tester
Add Gender	Test if the system allows the super admin to add gender	Tester
Activate & Deactivate Gender	Test if the system allows the super admin to activate and deactivate gender	Tester
Add Year Level	Test if the system allows the super admin to add year level	Tester
Activate & Deactivate Year Level	Test if the system allows the super admin to activate and deactivate year level	Tester
Add Academic Status	Test if the system allows the super admin to add academic status	Tester
Activate & Deactivate Academic Status	Test if the system allows the super admin to activate and deactivate academic status	Tester
Add Faculty Status	Test if the system allows the super admin to add faculty status	Tester
Activate & Deactivate Faculty Status	Test if the system allows the super admin to activate and deactivate faculty status	Tester
Add Document Type	Test if the system allows the super admin to add document type	Tester
Activate & Deactivate Document Type	Test if the system allows the super admin to activate and deactivate document type	Tester
Add Forum Setting	Test if the system allows the super admin to add forum setting	Tester
Activate & Deactivate Forum Setting	Test if the system allows the super admin to activate and deactivate forum setting	Tester
Add Reason for Disapproval of Forum	Test if the system allows the super admin to add disapproval of forum	Tester
Activate & Deactivate Disapproval of Forum	Test if the system allows the super admin to activate and deactivate disapproval of forum	Tester
Add Research Category	Test if the system allows the super admin to add research category	Tester
Activate & Deactivate Research Category	Test if the system allows the super admin to activate and deactivate research category	Tester
Add Reason for Disapproval of Research	Test if the system allows the super admin to add disapproval of research	Tester
Activate & Deactivate Disapproval of Research	Test if the system allows the super admin to activate and deactivate disapproval of research	Tester
Add Event Type for Forum	Test if the system allows the super admin to add event type for forum	Tester
Activate & Deactivate Event Type for Forum	Test if the system allows the super admin to activate and deactivate event type for forum	Tester
Add Roles	Test if the system allows the super admin to add roles	Tester

Software Test Plan for Research Analytics Approval and Archiving System

Activate & Deactivate Roles	Test if the system allows the super admin to activate and deactivate roles	Tester
Add Modules	Test if the system allows the super admin to add modules	Tester
Activate & Deactivate Modules	Test if the system allows the super admin to activate and deactivate modules	Tester
Add Permission	Test if the system allows the super admin to add permission	Tester
Activate & Deactivate Permission	Test if the system allows the super admin to activate and deactivate permission	Tester
Add User Accounts	Test if the system allows the super admin to add user account	Tester
Activate & Deactivate User Accounts	Test if the system allows the super admin to activate and deactivate user account	Tester
Administrator Module		
Login & Logout	Test if the system allows the admin to login and logout their account	Tester
Scan Barcode	Test if the system allows the admin to scan barcode to preview research	Tester
Approve Research	Test if the system allows the admin to approve submitted research	Tester
Deny Research	Test if the system allows the admin to deny submitted research	Tester
Enable Full Research View	Test if the system allows the admin to enable full research view	Tester
Configure School Year	Test if the system allows the admin to configure the academic school year	Tester
Configure Director	Test if the system allows the admin to configure the current director	Tester
User Activity Log	Test if the system allows the admin to view the activities done by the user	Tester
Add Forum	Test if the system allows the admin to add forum	Tester
Approve Forum	Test if the system allows the admin to approve forum	Tester
Deny Forum	Test if the system allows the admin to deny forum	Tester
Generate Report	Test if the system allows the admin to generate reports	Tester
Add Users	Test if the system allows the admin to users	Tester
Users Module		
Login & Logout	Test if the system allows the user to login and logout their account	Tester
Browse by Title	Test if the system allows the user search research by title	Tester

Software Test Plan for Research Analytics Approval and Archiving System

Browse by School Year	Test if the system allows the users to search research by school year	Tester
Upload Research	Test if the system allows the users to upload research	Tester
Add to Favorites	Test the system if the system allows the users to add research to favorites	Tester
Manage Research	Test if the system allows the users to manage research like edit	Tester
Print Voucher	Test if the system allows the users to print module	Tester
Guest Module		
Browse by Title	Test if the system allows the user search research by title	Tester
Browse by Keywords	Test if the system allows the users to search research by keywords	Tester
Browse by School Year	Test if the system allows the users to search research by school year	Tester

3.3. FEATURES TO BE TESTED

Function	To be tested
Login and Logout	Login and logout button
Browse Researches – browsing researches by:	
Title	accuracy
Keywords	Accuracy
School Year	accuracy
Admin	
Research Approval	Approve and disapprove button
Track Users Activity	accuracy
Announcement	Add and submit button
Generation of Reports	Report view
Configure	
Director	add and submit button
School Year	add and submit button
User role - a function or part played by the user	
Upload Researches	add and submit button
Manage Researches	form view
Upload Forum	Add and submit button
Upload Seminars, Conferences, and Training attended	add and submit button

3.3 TEST APPROACH

During the research process, Research Analytics Approval and Archiving System will be reviewed on a regular basis. This method incorporates test cases. The developers are in-charge of the functionalities, ensuring that all bugs discovered have been corrected.

3.4 TEST PASS / FAIL CRITERIA

4. Items to test	Expected Result	Actual Results is achieved? Y or N	Pass / Fail / Not executed / Suspended
Super Admin Module			
Login & Logout	The system allows the admin to login and logout their account	Y	PASS
Set research to preview	The system allows the super admin to set researchers to preview	Y	PASS
Add Course	The system allows the super admin to add courses	Y	PASS
Activate & Deactivate Course	The system allows the super admin to activate and deactivate courses	Y	PASS
Add Gender	The system allows the super admin to add gender	Y	PASS
Activate & Deactivate Gender	The system allows the super admin to activate and deactivate gender	Y	PASS
Add Year Level	The system allows the super admin to add year level	Y	PASS
Activate & Deactivate Year Level	The system allows the super admin to activate and deactivate year level	Y	PASS
Add Academic Status	The system allows the super admin to add academic status	Y	PASS
Activate & Deactivate Academic Status	The system allows the super admin to activate and deactivate academic status	Y	PASS

Software Test Plan for Research Analytics Approval and Archiving System

Add Faculty Status	The system allows the super admin to add faculty status	Y	PASS
Activate & Deactivate Faculty Status	The system allows the super admin to activate and deactivate faculty status	Y	PASS
Add Document Type	The system allows the super admin to add document type	Y	PASS
Activate & Deactivate Document Type	The system allows the super admin to activate and deactivate document type	Y	PASS
Add Forum Setting	The system allows the super admin to add forum setting	Y	PASS
Activate & Deactivate Forum Setting	The system allows the super admin to activate and deactivate forum setting	Y	PASS
Add Reason for Disapproval of Forum	The system allows the super admin to add disapproval of forum	Y	PASS
Activate & Deactivate Disapproval of Forum	The system allows the super admin to activate and deactivate disapproval of forum	Y	PASS
Add Research Category	The system allows the super admin to add research category	Y	PASS
Activate & Deactivate Research Category	The system allows the super admin to activate and deactivate research category	Y	PASS
Add Reason for Disapproval of Research	The system allows the super admin to add disapproval of research	Y	PASS
Activate & Deactivate Disapproval of Research	The system allows the super admin to activate and deactivate disapproval of research	Y	PASS
Add Event Type for Forum	The system allows the super admin to add event type for forum	Y	PASS
Activate & Deactivate Event Type for Forum	The system allows the super admin to activate and deactivate event type for forum	Y	PASS
Add Roles	The system allows the super admin to add roles	Y	PASS

Software Test Plan for Research Analytics Approval and Archiving System

Activate & Deactivate Roles	The system allows the super admin to activate and deactivate roles	Y	PASS
Add Modules	The system allows the super admin to add modules	Y	PASS
Activate & Deactivate Modules	The system allows the super admin to activate and deactivate modules	Y	PASS
Add Permission	The system allows the super admin to add permission	Y	PASS
Activate & Deactivate Permission	The system allows the super admin to activate and deactivate permission	Y	PASS
Add User Accounts	The system allows the super admin to add user account	Y	PASS
Activate & Deactivate User Accounts	The system allows the super admin to activate and deactivate user account	Y	PASS
Login & Logout	The system allows the admin to login and logout their account	Y	PASS
Scan Barcode	The system allows the admin to scan barcode to preview research	Y	PASS
Approve Research	The system allows the admin to approve submitted research	Y	PASS
Deny Research	The system allows the admin to deny submitted research	Y	PASS
Enable Full Research View	The system allows the admin to enable full research view	Y	PASS
Configure School Year	The system allows the admin to configure the academic school year	Y	PASS
Configure Director	The system allows the admin to configure the current director	Y	PASS
User Activity Log	The system allows the admin to view the activities done by the user	Y	PASS
Add Forum	The system allows the admin to add forum	Y	PASS
Approve Forum	The system allows the admin to approve forum	Y	PASS
Deny Forum	The system allows the admin to deny forum	Y	PASS

Software Test Plan for Research Analytics Approval and Archiving System

Generate Report	The system allows the admin to generate reports	Y	PASS
Add Users	The system allows the admin to users	Y	PASS
Login & Logout	The system allows the user to login and logout their account	Y	PASS
Browse by Title	The system allows the user search research by title	Y	PASS
Browse by School Year	The system allows the users to search research by school year	Y	PASS
Upload Research	The system allows the users to upload research	Y	PASS
Add to Favorites	The system allows the users to add research to favorites	Y	PASS
Manage Research	The system allows the users to manage research like edit	Y	PASS
Print Voucher	The system allows the users to print module	Y	PASS
Browse by Title	The system allows the user search research by title	Y	PASS
Browse by Keywords	The system allows the users to search research by keywords	Y	PASS
Browse by School Year	The system allows the users to search research by school year	Y	PASS

All systems' core functions should work as planned and as defined in the individual test cases. There must be no crucial flaws, and an end user must be able to effectively complete a transaction period and initiate a refund without making any mistakes. All test cases should pass 95% of the time, and no failed cases should be critical to the end-ability users to use the app.

4.1 TEST ENTRY / EXIT CRITERIA

The following elements are required to support the overall testing effort at all levels within the system.

Software Test Plan for Research Analytics Approval and Archiving System

- A. The software requirements include: a computer or laptop with minimum requirements, a printer, and a broadband, modem, dial-up, or any kind of source for internet connection.
- B. The project requires a test plan and test cases.
- C. The project runs on the browser, pdf reader.

4.2 TEST DELIVERABLES

- The use of the system, reports, and feedback from users will all be included in the deliverables.
- To ensure that all of the work responds promptly, performance testing requires a list of modules, features, and functions.

4.3 TEST SUSPENSION / RESUMPTION CRITERIA

The test will only be halted if the device fails to work as intended or if the developers are updating it. It will restart once the developers have uploaded the most recent version and verified that all functions are operational.

1. Only when the person in charge is unavailable can the test be suspended
2. The test would only be halted if the device is being implemented during library business hours. It will restart when it is no longer in service.
3. The test will only stop if the device is not running properly or if it is down due to system changes or improvements. It will only restart after all the problems, bugs, and errors have been resolved.

4.4 TEST ENVIRONMENTAL

Software Test Plan for Research Analytics Approval and Archiving System

The system will run on their computer or the administrative office's desktop. Testing will be handled by both the developers and the management. The users as well as the person in charge of the project setup must be computer literate. Upon testing the system, the recommended browser is chrome.

5. APPROVALS

The signatory acknowledges that they have read and agree with the **Online Repository for Theses and Capstone Projects System Test Plan** Test Plan document and agree the approach it presents. Any changes to this Requirements Definition will be discussed with the undersigned or their designated representatives and should be approved.

APPENDIX A: REFERENCES

The documents cited in this document are summarized in the table below.

Document Name and Version	Description	Location
Software Test Plan Online Repository of Theses and Capstone	First draft	Local
Software Test Plan Research Analytics Approval and Archiving System	Second draft	Local

APPENDIX B: Key Terms

The definition of terms that is relevant in this document are provided in the table below.

Term	Definition
Maintenance	To sustain the capability of a system to provide a service, these are the adaptive records.
PUPT	One of the branches of Polytechnic University of the Philippines, which is in General Santos Ave., Taguig City
Voucher	A document used for validation of transaction
Repository	An online storage of files, particularly in universities
